

4.5:1 pilot ratio, semi-restrictive counterbalance valve SERIES 1 / CAPACITY: 40 L/min. / CAVITY: T-11A

sunhydraulics.com/model/CBE

CONFIGURATION

L	Control	Standard Screw Adjustment	
K	Functional Setting Range	1000 - 2500 psi w/25 psi Check (70 - 175 bar w/ 1,7 bar Check), 2000 psi (140 bar) Standard Setting	
N	Seal Material	Buna-N	
(none) Material/Coating		Standard Material/Coating	

Counterbalance valves with pilot assist are meant to control an overrunning load. The check valve allows free flow from the directional valve (port 2) to the load (port 1) while a direct-acting, pilot-assisted relief valve controls flow from port 1 to port 2. Pilot assist at port 3 lowers the effective setting of the relief valve at a rate determined by the

Other names for this valve include motion control valve and over-center valve.

TECHNICAL DATA

NOTE: DATA MAY VARY BY CONFIGURATION. SEE CONFIGURATION SECTION.

Cavity T-11A Series 1 Capacity 40 L/min. Pilot Ratio 4.5:1 Maximum Recommended Load Pressure at Maximum Setting 270 bar Maximum Setting 350 bar Factory Pressure Settings Established at 30 cc/min. Maximum Valve Leakage at Reseat 0,3 cc/min. Adjustment - No. of CCW Turns from Min. to Max. Setting 3.75 Operating Characteristic Semi-restrictive Reseat >85% of setting Valve Hex Size 22,2 mm Valve Installation Torque 41 - 47 Nm Adjustment Screw Internal Hex Size 4 mm Locknut Hex Size 15 mm Locknut Torque 9 - 10 Nm Seal kit - Cartridge Buna: 990011007 Seal kit - Cartridge EPDM: 990011014 Seal kit - Cartridge Polyurethane: 990011002 Seal kit - Cartridge Viton: 990011006 Model Weight 0.16 kg.

TECHNICAL FEATURES

- Counterbalance valves should be set at least 1.3 times the maximum load induced pressure.
- Turn adjustment clockwise to decrease setting and release load.
- Full clockwise setting is less than 200 psi (14 bar).
- Backpressure at port 2 adds to the effective relief setting at a ratio of 1 plus the pilot ratio times the backpressure.
- Reseat exceeds 85% of set pressure when the valve is standard set. Settings lower than the standard set pressure may result in lower reseat percentages.
- Sun counterbalance cartridges can be installed directly into a cavity machined in an actuator housing for added protection and improved stiffness in the circuit.
- Two check valve cracking pressures are available. Use the 25 psi (1,7 bar) check unless actuator cavitation is a concern.
- This valve has positive seals between all ports.
- All 3-port counterbalance, load control, and pilot-to-open check cartridges are physically interchangeable (i.e. same flow path, same cavity for a given frame size).
- Cartridges configured with EPDM seals are for use in systems with phosphate ester fluids. Exposure to petroleum based fluids, greases and lubricants will damage the seals.
- Corrosion resistant cartridge valves are intended for use in corrosive environments and are identified by the model code suffix /AP for external stainless steel
 components, or /LH for external zinc-nickel plated components. See the CONFIGURATION section for all options. For further details, please see the Materials of
 Construction page located under TECH RESOURCES.
- Incorporates the Sun floating style construction to minimize the possibility of internal parts binding due to excessive installation torque and/or cavity/cartridge machining variations.
